

GREG BELL Lieutenant Governor

State of Utah

DEPARTMENT OF NATURAL RESOURCES

MICHAEL R. STYLER

Executive Director

Division of Oil, Gas and Mining

JOHN R. BAZA

Division Director

Representatives Present During the Inspection:							
Company	Dennis Oakley						
OGM	Karl Houskeeper						

Inspection Report

Permit Number:	C0150018				
Inspection Type:	PARTIAL				
Inspection Date:	Tuesday, December 14, 2010				
Start Date/Time:	12/14/2010 8:00:00 AM				
End Date/Time:	12/14/2010 12:30:00 PM				
Last Inspection:	Thursday, November 04, 2010				

Inspector: Karl Houskeeper,

Weather: Partly Cloudy, Temp. 32 Deg. F.

InspectionID Report Number: 2595

Accepted by: jhelfric 12/16/2010

Permitee: ENERGY WEST MINING CO Operator: ENERGY WEST MINING CO

Site: **DEER CREEK MINE**

Address: PO BOX 310, HUNTINGTON UT 84528

County: EMERY

Permit Type: PERMANENT COAL PROGRAM

Permit Status: ACTIVE

Current Acreages

B Total Permitted	19,740.78	
Total Disturbed	98.05	
Phase I	0.60	
Phase II		
Phase III		

Mineral Ownership

Types of Operations

✓ Federal Underground ✓ State Surface Loadout County ✓ Fee Processing Other Reprocessing

Report summary and status for pending enforcement actions, permit conditions, Division Orders, and amendments:

Inspector's Signature:

Karl R. Soushupe

Date

Tuesday, Decei

Permit Number: C0150018 Inspection Type: PARTIAL

Inspection Date: Tuesday, December 14, 2010

2. Signs and Markers

The mine identification signs located at the varied points of access of the public into the permit area contain the required information.

8. Noncoal Waste

Numerous items of noncoal waste items were observed, along the access road into the main facilities parking lot, in the parking lot, and around the shop area. Items were in sufficient quantity to warrant enforcement action. Time was given during the inspection to collect the items and avoid enforcement action. Future infractions on this magnitude will constitute enforcement action.

16.a Roads: Construction, Maintenance, Surfacing

Rocks and jersey barriers have been placed a varied locations along the side of the access road into the waste rock site in order to comply with MSHA regulations. These new features need to be identified on the surface facility map through the permit amendment process.

22. Other

Concrete blocks have been placed alongside of the road leading to the ROM (Run of Mine) pad. These blocks form a retaining wall to help prevent any rocks that may roll from the hillside from causing damage or injury. The location of the blocks is adjacent to the drive house of the ROM belt. The area is within the disturbed area and drainage from the area reports to a sediment pond. The blocks are portable and therefore should not affect the bond calculation. The wall created by the placement of the blocks needs to be identified on the surface facilities map through the permit amendment process.
